The following are software specifications required to install the Workflow Composer Editor on a computer:

Microsoft® Windows 2000 Professional (Service pack 4)/2000 Server (Service Pack 4)

Microsoft Windows XP Professional 32-bit Edition (Service Pack 2)/(Service Pack 3)

Microsoft Windows Server 2003 32-bit Edition (Service Pack 2)/R2 32-bit Edition (Service Pack 2)

Microsoft Windows Vista® Enterprise 32-bit Edition/(Service Pack 1)/(Service Pack 2)

Microsoft Windows Vista Enterprise 64-bit Edition (Service Pack 1)/(Service Pack 2)

Microsoft Windows Vista Ultimate 32-bit Edition/(Service Pack 1)/(Service Pack 2)

Microsoft Windows Vista Ultimate 64-bit Edition (Service Pack 1)/(Service Pack 2)

Microsoft Windows Vista Business 32-bit Edition/(Service Pack 1)/(Service Pack 2)

Microsoft Windows Vista Business 64-bit Edition (Service Pack 1)/(Service Pack 2)

Microsoft Windows Server 2008 32-bit Edition/(Service Pack 2)

Microsoft Windows Server 2008 64-bit Edition/(Service Pack 2)

Microsoft Windows Server 2008 R2

Microsoft Windows 7 Professional 32-bit Edition/64-bit Edition

Microsoft Windows 7 Enterprise 32-bit Edition/64-bit Edition

Microsoft Windows 7 Ultimate 32-bit Edition/64-bit Edition

#### Web Browser

To activate your Workflow Composer Editor license, any of the following Web browsers must be installed on your system:

Microsoft Internet Explorer® 5.5 SP2/6.0 SP1 or later

Windows Internet Explorer 7.0/8.0/9.0/10.0

### Workflow Composer Supported Devices

imageRUNNER ADVANCE C9280 PRO/C9270 PRO

imageRUNNER ADVANCE C9075 PRO/C9065 PRO

imageRUNNER ADVANCE C7270/C7260

imageRUNNER ADVANCE C7065/C7055

imageRUNNER ADVANCE C5255/C5250/C5240/C5235

imageRUNNER ADVANCE C5051/C5045/C5035/C5030

imageRUNNER ADVANCE C2230/C2225

imageRUNNER ADVANCE C2030/C2020

imageRUNNER ADVANCE 8205/8295/8285

imageRUNNER ADVANCE 8105/8095/8085

imageRUNNER ADVANCE 6275/6265/6255

imageRUNNER ADVANCE 6075/6065/6055

imageRUNNER ADVANCE 4051/4045/4035/4025

imageRUNNER ADVANCE 500iF/400iF

## Workflow Composer

### Software Solution

streamlined workflow

reduce processes

external systems connection

Simply advanced.

# Simplified operation. Compose a better way to work.

## Workflow Composer

for the imageRUNNER® ADVANCE Series

A solution that simplifies the Canon imageRUNNER ADVANCE system's operation by easily combining multiple user operations into a personalized, one-step button that accelerates workflows.

For example, a user can register a series of operations, such as scanning a letter-sized original, sending it by fax, and then storing a backup copy of a scanned PDF file in a network folder location.

Administrators can pre-define folders to make saving easier for users with a drop-down index, or leave it up to the users to designate a specific destination. The naming of files can be freeform or automated using either a scheme specified at the system-level, the user-level, or according to a designed pattern.

### Seamless Connections

Workflow Composer automates the sophisticated input and output features of imageRUNNER ADVANCE systems through simple macros, as well as enhancing workflows through a number of standard and optional connectors and features.

It has a MEAP® application (installed on an imageRUNNER ADVANCE model) and a PC application (Workflow Composer Editor). It also includes Standard Connectors and offers Optional Connectors that can be purchased separately.

### Workflow Composer Editor

Workflow Composer Editor is an application for creating flows on a Windows® based computer. To create a flow, first select an imageRUNNER ADVANCE model as the target. Once a model is selected, the Workflow Composer Editor connects to it, enabling you to create flows utilizing the available functions. When uploaded and registered in the selected target, the flow can be executed on the imageRUNNER ADVANCE system.

Flows stored in a target can also be retrieved, edited with the Workflow Composer Editor, and then uploaded to the target again or to other imageRUNNER ADVANCE systems.

## Standard Connectors

### MEAP Connector for SMB

Scan to send documents by SMB Protocol, with or without Index Data.

### MEAP Connector for FTP

Scan to send documents by FTP Protocol, with or without Index Data.

### MEAP Connector for WebDav

Scan to send documents by WebDav Protocol, with or without Index Data.

### Index Lookup Option for MEAP Connector

Looks up the Index Data Table on an external server in conjunction with other MEAP Connectors.

## Option: Other Server Connectors

### MEAP Connector for Document Server

Scan to send the documents to imageWARE Document Server with Index Data.

### MEAP Connector for SharePoint® Server

Scan to send the documents to SharePoint Server 2007/2010 with Index Data.

## Advanced Productivity

Canon Workflow Composer easily transforms paper into business value by leveraging Canon imageRUNNER ADVANCE technology to bridge paper and digital workflows, seamlessly integrating paper documents and business applications.

- Multiple tasks combined into one operation with Workflow Connector buttons
- Scan documents with Index data
- Send to pre-defined or ad hoc destinations
- Eliminate or reduce processes
- Achieve goals in less time

## Solution

A better way to work for everyone
