

Delivering Increased Versatility and Value

Océ Arizona 480 GT UV flatbed printer

Serious tools for serious craftsmen

Creative professionals dedicated to the production of high-quality sign and display applications demand high quality tools. The Océ Arizona® 480 GT printer offers remarkable application versatility and productivity, while maintaining the uncompromising quality favored by Océ Arizona Series customers.

FEATURES

- Eight independent ink channels with support for new applications and more real-world productivity
 - Varnish for spot and flood decorative applications or double-opacity White ink printing if preferred
 - CM² (C-M-squared) featuring double the nozzle-density in Cyan and Magenta for beautifully smooth production printing
 - New! Production-Squared™ mode that's nearly 25% faster
- Active pixel placement compensation for assured image sharpness, density and uniformity across the entire flatbed or Roll Media Option
- Six user-selectable vacuum zones designed to match most standard-sized graphic arts media without masking
- Batch mode for streamlining multi-layered jobs or facilitating set collation
- Print speeds up to 353 ft.²/32.8 m² per hour with saleable print quality
- Text as small as 2-pt is legible
- True flatbed design uses a vacuum system to hold media stationary on a flat surface, ensuring accurate registration for multiple over-prints or panels
- Print on irregularly-shaped or non-square items, heavy substrates such as glass, or materials that have an uneven surface such as plywood
- The Roll Media Option can be added at any time, for printing onto most flexible media without interfering with the rigid printing workflow

OCÉ VARIADOT TECHNOLOGY

Océ VariaDot® technology can simultaneously jet smaller 6, 12, and 18 picoliter droplets for the production of sharp images and smooth quartertones, as well as larger 24, 30, 36 and 42 picoliter droplets for the production of dense, uniform solid colors. The result is near-photographic quality with sharpness only before seen at resolutions of 1,440 dpi or higher.

Océ VariaDot technology features award-winning image quality suitable for POP production, backlit images, exhibition graphics, industrial applications and more. Print on virtually any rigid or flexible material to meet your diverse customer needs.
